### New Measurement Uncertainty And Traceability Policies Webinar

AIHA Laboratory Accreditation Programs, LLC (AIHA-LAP, LLC) held a free 90-minute webinar for its accredited laboratories to review the new measurement uncertainty and traceability policies and related guidance recently published on its website. A copy of the Power Point presentation can be found [here](#).

### NEW Message To Accredited Labs 2010 Policy Changes and New Guidance Documents Posted

February 19, 2010

Accredited laboratories and interested parties should note that 2010 Policy changes and new guidance documents (announced and generally described on the web site in November 2009) have now been posted to AIHA Laboratory Accreditation Programs (AIHA-LAP), LLC web site. Please go to the [Policy Modules](#) to review, print/save and become familiar with these new policies and documents that become effective **April 1, 2010**. A document summarizing the policy changes can be found on this page along with a folder with the policy documents that appear in the "tracked changes" format. The clean versions of the Policies are found in the individual links at the bottom of the page. It is especially important that you review new policy appendices and documents on measurement uncertainty (*Policy on Estimation of Uncertainty of Measurement, Appendix G* and related guidance documents/examples that have been posted.) As well, you should carefully review the new traceability documents (*Policy on Traceability of Measurement, Appendix H* and related guidance documents.)

We will be conducting a 90 minute webinar on March 11, 2010 beginning at noon Eastern Time to review these new policies and guidance documents. Reviewing the new policies, along with participation in the webinar, may allow you to identify any changes that you will need to make, as well anticipated documentation. More information about the measurement uncertainty webinar will be available next week. Also, next week you can expect to receive an email from us highlighting the differences between our prior guidance on measurement uncertainty and traceability and the new policies and related documents. This document will help you prepare for the webinar and navigate through the new documents. If you have questions or require additional information before the webinar, please don't hesitate to give AIHA-LAP, LLC staff a call.

Regards,  
Cheryl O. Morton  
Director, AIHA-LAP, LLC
